

→INTRO

Good Morning,

- My name is **Himanshu Ranjan Rai** and I belong to **Ballia**, a city of Uttar Pradesh.
- I have completed my Bachelor of technology in information technology from **Babu Banarasi Das Northern India Institute Of Technology**, Lucknow in 2019 and my Intermediate and Highschool from Gyan Kunj Academy in 2014 & 2012 respectively.
- Currently I am pursuing “**Data Science course**” from “**Edyoda Digital University**” and also I am working as a “**Python Intern**” at “**Softora Technologies**”.
- I have worked over a **Movie Library** project using Tkinter in Python and currently am working over Music Player project.
- Other than my technical skills, I love singing and Cricket is my favourite sports.
- The things which filters me out from others are my understanding skills and being optimistic in any situation .
- No matter what is going to happen, I never giveup .
- I am a quick learner who loves to explore new things.

→ Why I choosed this course?

- My intrest for “**Dealing over Data**” started when I was introduced with “**Big data**”subject in my Engineering.
- From that day I always dreamed to make my career in this field.
- So,I am very much interested in Data science from my Third year.
- After graduation due to panademic, I was not getting opportunities.
- I want to explore data science .So, I surfed over internet ,found few companies who were teaching data science.
- I was looking for a course which either have **EMI** or **ISA**.
- I researched over all the list of companies and found **Edyoda** ,a genuine company by viewing reviews over linkedin.
- I joined this course for job assistance as well as for certifications.
- Edyoda has ticked all my needs at an affordable fee.
